

SMART Goals Template

Crafting SMART goals helps you identify the aspects of your project that are realistic and achievable; this exercise also helps you set a deadline. When writing SMART goals, use concise language and include only relevant information. This worksheet is designed to help you succeed, so be positive when answering the questions.

INITIAL GOAL	Write the goal that you have in mind. Build a stronger professional profile and become more competitive for BAIS-related internships.
SPECIFIC S	What do you want to accomplish? Who needs to be included? When do you want to do this? Why is this a goal? Over the next six months, I want to strengthen my resume, LinkedIn, technical skills, and portfolio while consistently applying for internships in business analytics, data analytics, information systems, product, and technology. I also want to focus on companies and positions that genuinely interest me.
MEASURABLE M	How can you measure progress and know if you've met your goal? I will measure my progress by: - Creating or improving at least 3 portfolio projects using skills such as Python, SQL, Excel, databases, or data visualization - Updating my resume and LinkedIn - Creating a system to track my internship applications - Applying to at least 40 targeted internships - Having at least 2 networking conversations per month with professionals, recruiters, alumni, or people working in BAIS-related careers
ACHIEVABLE A	Do you have the skills required to achieve the goal? If not, can you obtain them? What is the motivation for achieving this goal? Is the amount of effort required on par with what the goal will achieve? I already have experience with Excel, Python, databases, and other BAIS coursework, so I can use projects from my classes as a starting point and improve them for my portfolio. I can also use career fairs, LinkedIn, professors, alumni, and people I already know to help me learn more about internship opportunities.
RELEVANT R	Why am I setting this goal now? Is it aligned with our overall objectives? This goal is important because an internship is not only something I want to have on my resume. I want to develop experience that will help me determine what areas of BAIS I enjoy most and make me a stronger candidate for technology and analytics careers later.
TIME-BOUND T	What's the deadline and is it realistic? I will complete this goal by March 31, 2027.
	Review your answers above and craft a new goal statement based on them.

SMART GOAL

By March 31, 2027, I will strengthen my professional profile by completing at least three BAIS-related portfolio projects, updating my resume and LinkedIn, applying to at least 40 targeted internships, and completing two networking conversations each month so that I can become a more competitive candidate for analytics and technology opportunities.

SMART Goals Template

Crafting SMART goals helps you identify the aspects of your project that are realistic and achievable; this exercise also helps you set a deadline. When writing SMART goals, use concise language and include only relevant information. This worksheet is designed to help you succeed, so be positive when answering the questions.

INITIAL GOAL	Write the goal that you have in mind. Develop a clearer career specialization within BAIS and build the skills needed for that career path.
SPECIFIC S	What do you want to accomplish? Who needs to be included? When do you want to do this? Why is this a goal? Over the next year, I want to explore different areas within BAIS, particularly data analytics, business intelligence, product analytics, and technology. I want to identify which area fits my strengths and interests best and develop a portfolio that demonstrates both my technical and creative abilities.
MEASURABLE M	How can you measure progress and know if you've met your goal? I will: - Research at least 4 different BAIS career paths - Complete at least 2 more advanced portfolio projects related to the career area I am most interested in - Become more comfortable using Python, SQL, Excel, and at least one data visualization tool - Attend at least 2 career fairs or professional networking events - Complete at least 5 informational interviews or career conversations with people working in technology or analytics - Create a list of companies and positions I would want to pursue after college
ACHIEVABLE A	Do you have the skills required to achieve the goal? If not, can you obtain them? What is the motivation for achieving this goal? Is the amount of effort required on par with what the goal will achieve? My BAIS classes are already helping me build technical skills, and I can use class projects as opportunities to explore different areas. I can also use career fairs, alumni, LinkedIn, professors, and internships to learn what different careers are like.
RELEVANT R	Why am I setting this goal now? Is it aligned with our overall objectives? I am interested in technology but also enjoy creative work, so I want to find a career path where I can combine analytical thinking, technology, problem solving, and creativity. Developing a specialization will help me make more intentional choices about internships, electives, projects, and future jobs.

TIME-BOUND T	What's the deadline and is it realistic?
	I will accomplish this by October 1, 2027.
SMART GOAL	Review your answers above and craft a new goal statement based on them.
	By October 1, 2027, I will identify a BAIS career specialization that fits my technical and creative interests by researching at least four career paths, completing two advanced portfolio projects, attending two professional events, and having at least five conversations with professionals in analytics or technology.

SMART Goals Template

Crafting SMART goals helps you identify the aspects of your project that are realistic and achievable; this exercise also helps you set a deadline. When writing SMART goals, use concise language and include only relevant information. This worksheet is designed to help you succeed, so be positive when answering the questions.

INITIAL GOAL	Write the goal that you have in mind.
	Establish myself as a skilled early-career analytics or technology professional and become competitive for companies such as Spotify.
SPECIFIC S	What do you want to accomplish? Who needs to be included? When do you want to do this? Why is this a goal? Within three years, I want to develop into an early-career professional who can independently contribute to data-driven projects at a major technology or digital media company. Spotify is one company I am especially interested in, but I would also consider similar technology companies where I could combine analytics, technology, business, and creativity.
MEASURABLE M	How can you measure progress and know if you've met your goal? I will: - Build a portfolio containing at least 5 strong professional or academic projects - Gain experience through internships, professional work, or major project experience - Develop strong proficiency in Python, SQL, Excel, and data visualization/business intelligence tools - Build relationships with at least 10 professionals working in technology, analytics, product, or digital media - Continue improving my ability to communicate technical findings to nontechnical audiences - Take on increasing responsibility in projects so that I can eventually independently manage or lead analytical work
ACHIEVABLE	Do you have the skills required to achieve the goal? If not, can you obtain them? What is the motivation for achieving this goal? Is the amount of effort required on par with what the goal will achieve?

A

I will continue building my skills through BAIS coursework, internships, personal projects, networking, and professional experience. I do not expect to immediately enter my ideal position, so I can use early-career opportunities to develop the experience needed to eventually work for companies such as Spotify.

RELEVANT

Why am I setting this goal now? Is it aligned with our overall objectives?

R

My long-term career interests involve technology, analytics, problem solving, and creativity. Building technical experience while also developing communication and creative thinking skills would prepare me for the type of work I want to pursue.

TIME-BOUND

What's the deadline and is it realistic?

T

I will work toward accomplishing this goal by October 1, 2029.

SMART
GOAL

Review your answers above and craft a new goal statement based on them.

By October 1, 2029, I will develop into a competitive early-career analytics or technology professional by building a portfolio of at least five strong projects, gaining relevant professional experience, developing advanced technical skills, and building a network of at least ten professionals in the technology and digital media industries, positioning myself for opportunities at companies such as Spotify.
